## What are Wikki Stix?

Wikki Stix are colorful, bendy, sticky... and kinda weird! But Wikki Stix are way cool because you can do lots of creative things with them. You can stick them to paper and make picture and shapes. Or you can mold them like clay and make sculptures. And parents, don't worry, Wikki Stix are non-toxic. They are recommended for children age 3 and up.

Try tracing this funny donkey with your Wikki Stix!
